

Dear FTS class of 2037,

My name is Olivia Luciano from the class of 2020. I'm excited to tell you about one of the many reasons FTS is a special school right now in the year 2015. I'm also excited to guess some big changes there might be in 2037.

I think the best part of FTS is the teachers and students. All of my teachers have been so nice and taught me so much. Dr. Petersen, my kindergarten teacher, made Franklin feel like home and was always so kind. Mr. Weinhold, my third grade teacher, is really funny and has cool fish in his room. The students at FTS are the best! We all are part of the school family and since we are a small school we know everyone. Kids are friendly and always help each other. FTS community is one of a kind in my opinion and makes our school special.

I think FTS in 2037 will be much more electronic. I bet all of the lockers will have touch pads instead of pad locks. Maybe you will be able to order your lunch right from your iPad and it'll be ready when you get to the cafeteria. I think there will not be any more snow days. Instead, teachers could hold class over the computer and students could watch at home on their iPads.

Well I hope the class of 2037 loves FTS as much as I do. I hope I'll be there for the opening of the time capsule so I can see if any of my predictions came true!

Your friend,

Olivia Luciano, class of 2020
