

Foxes in Franklin

By Gavin Buczek, second place, fourth grade

Tracy Strycky, teacher

I have a family of foxes that live in my yard. They sleep under my shed and come out at night and sometimes during the day. They are beautiful animals. Foxes are fast and impressive to watch,. They always seem to travel together.

Sometimes when I ride home from school, I'll spot a fox or two running on the side of the road. I enjoy looking for them. Sometimes I wonder if they are part of the same family that lives under my shed.

Foxes keep to themselves. They don't like to be around humans. I think it's because they are afraid of us. Some people are afraid of foxes, but they are gentle animals that leave people alone. I've never gotten really close to a fox, but I can see them having fun with each other when I watch them from my room.

I'm an animal lover. I have two guinea pigs who I play with every day. The way they get along and treat each other every day is what I see when two foxes are playing together.

This summer I plan on going to the zoo. I'm hoping to see a fox up close and maybe get to pet one. I'm also going to learn all I can about foxes, so I can gain better understanding of the ones that live under my shed. I think that foxes are some of the most interesting animals that can be found in Franklin Township.
